MR. JOHN LAIRD, M. P., ON THE ALABAMA.

On Friday, Oct. 25, the prizes for rifle and

artillery shooting competed for by the volunteers of Birkenhead were distributed by Mr. John Laird, M. P., who presided.

Mr. Laird made a speech on National Defense, in the course of which he referred to the Alabama. "I do

not know that I ought to occupy your time any longer,

but various statements have been made about a vessel

that has attained to some degree of fame. I refer to a vessel well known throughout this country—the Alabama. [Loud and repeated cheering.] I am very ashamed to say that when we first heard of her family have had to go to the dock that she should be contoured. I

should not have made any remark now, but for the fact

that the Government of this country have made certain

statements, and have given certain legal opinions about

her, and they have talked about the vessel ever since

she was captured. I see my friend Mr. Hind and other gentlemen

who are somewhat of sporting men, and they know

what I mean when I say that the family have

done what they did, and when the family have

done what they did, still some statements have

been made about her which should be contoured. I

should not have made any remark now, but for the fact
